DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 06/02/08 has been entered.

Allowable Subject Matter

2. After a further search and thorough examination of the present application and in view of the applicant's arguments, claims 7, 8, 13-18, 21, and 26-28, renumbered as 1-12, are found to be in condition of allowance.

3. The following is an examiner's statement of reasons for allowance: the prior arts teach the gateway authenticates the user which is then allowed to make and receive calls in the system; IP network could be wireless, the portable terminal or mobile phone can use VOIP for communication and receives IP packet over the network; the home controller or the visitor controller has a database to collect information about the portable terminal when within the range of the home/visitor; packetizing voice message and sends it over the wireless IP network which can also be used for VoIP; a gateway apparatus for connecting a circuit switched communication network to a packet switched data network comprises a processor for packetizing logic configured to

translate data from the circuit switched communication network into a format suitable for transmission over the packet-switched data network to a terminal.

On the other hand, the Applicant teaches, inter alia, a method of call delivery to a packet-switched telephony subscriber that is roaming within a packet-switched telephone network comprising the home function providing the address of the visited function to the calling entity; and the home function communicating with the visited function to determine that the called subscriber can receive the call prior to providing the visited function address to the calling entity.

The Applicant further teaches providing the visited function address to the calling entity only if the called subscriber can receive the call; and otherwise, if the called subscriber is unable to receive the call, the home function returning an address corresponding to the subscriber where the calling entity may leave a voice message for the called subscriber. These limitations, in conjunction with all limitations of the independent claims, have not been disclosed, taught, or made obvious over the prior arts of record.

The Applicant further teaches the establishing step comprising; sending call control signaling between the calling entity and the visited function to set up the packet-switched telephony call, and sending the media of the packet-switched telephony call directly from the calling entity to the visited function. These limitations, in conjunction with all limitations of the independent claims, have not been disclosed, taught, or made obvious over the prior arts of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
